Dynatronics Introduces 2009 Catalog with Thousands of New Products

Salt Lake City, Utah (September 4, 2008) – Dynatronics Corporation (NASDAQ: DYNT) today announced it has begun shipping its new 2009–2010 product catalog to customers. The new catalog contains over 500 pages of products – more than double the company’s previous catalog.

“The acquisition of six of our top distributors last year has allowed us to greatly expand our product offering,” stated Larry K. Beardall, executive vice president of sales and marketing. “The catalog introduction has been timed perfectly for the fall selling season, which is traditionally one of our strongest periods of the year. With thousands of new products added this year, we expect to see a significant boost in our rehab product sales.”

Dynatronics has implemented pricing incentives in the new catalog to reward customers for placing larger orders.

“This new catalog is a major step in presenting our company’s new image to the market after a year of assimilation and change,” said Kelvyn H. Cullimore Jr., chairman and president of Dynatronics. “It represents a more consolidated and profitable approach to selling not only our high-quality manufactured products, but the hundreds of lines of distributed products we now represent.”

Dynatronics manufactures, markets and distributes advanced-technology medical devices, orthopedic soft goods and supplies, treatment tables and rehabilitation equipment for the physical therapy, sports medicine, chiropractic, podiatry, plastic surgery, dermatology and other related medical, cosmetic and aesthetic markets.
